Surface Diamond Driller Assistant Common Core

What is Surface Diamond Drilling?
 Diamond encrusted drill bits are drilled into the earth to collect core samples that are evaluated to detect precious minerals.

Join a Rapidly Growing Industry

Mineral exploration in the north is exploding, causing a high demand for surface diamond drillers and assistants. If you like travel, adventure, and the outdoors, this could be the career for you.

Why Not Train With THE BEST

Developed by the Haileybury School of Mines and the Canadian diamond drilling industry, this 10 week program offers hands on experience with skilled instructors who have drilled around the world.

What Are You Waiting For?

We are accepting registration now for the Fall Session beginning on **October 11, 2011**

Next programs starting on: **January 23 and April 23, 2012**

“The instructors were awesome, never leaving a question unanswered.” - Riley Watson, 2007 Graduate, Now Certified Driller with CABO Drilling (Ontario) Corp.
