

## Flight Suspensions to Canada

Dear Students,

As you may know, Canada has announced a 30-day flight suspension from India and Pakistan as of April 22. Because of this, Northern College is not able to issue any travel support documents including quarantine letters to students who planned to travel to Canada after April 22 due to this travel ban.

To keep your spot in your programs, we immediately deferred all students who had not yet arrived in Canada but were registered to study with us but could not travel due to this ban. We know that this is disruptive, and we apologize that you cannot join us at this time. We will keep monitoring the situation and keep you informed once the ban is removed.

Please be advised that for **Winter 2021 intake** students, most of you could study your program online in Canada or outside Canada as long as you had submitted your visa application before the start of your program study.

International students who are currently enrolled in **Electrical Engineering Technician** and **Environmental Technician – Water and Wastewater Systems Operation** programs are asked to please check with your program coordinators about your course study pathway in May 2021 to see if you must come to Canada on-site for your study.

If you are enrolled in these two programs and must be on-site in May semester, please work with your Northern College program coordinator for a different way to learn instead of in-person and send this information to us at [international@northern.on.ca](mailto:international@northern.on.ca) Please see the below table that has more information to help guide you.

This pandemic has caused many disruptions, and we realize how difficult this is, as education is very important to your future. We are thinking of you and your families and countries and thank you for your understanding of these adjustments to your learning in Canada.

### Winter 2021 Intake

Program	May 2021 Semester Study Format
Business General	Online
Business Marketing	Online
Computer Engineering Technician	Online (first two semesters)
General Arts & Science (Business Focus)	Online
